

PRODUCT OVERVIEW

CRANE BLOCKS & OVERHAUL BALLS

The Ropeblock portfolio includes a wide range of crane blocks with proven quality assured by a track record spanning 25 years.

MISCELLANEOUS BLOCKS

Ropeblock offers a wide choice of standard blocks. Some were developed for general purposes, others for specific rigging equipment. Possible applications include routing or guiding wire rope, upending and wall tilt-up, and cargo handling on merchant vessels.

SHEAVES

The Ropeblock range of highly efficient, Smart Engineered standard sheaves is extensive. It includes API sheaves, cast sheaves, plastic sheaves, welded sheaves, sheaves from solid materials and forged sheaves.

SOCKETS

Ropeblock provides sockets for both general purpose and high performance ropes. These sockets are used in extreme environments. Besides the standard sockets shown in this catalog we can Smart Engineer any required special socket solution.

TURNBUCKLES

Turnbuckles may be supplied in endless variations, in workload, in size, in take up, in locking, in connections, in type of thread.

COMPONENTS

The Ropeblock portfolio includes a wide choice of proven quality components for various lifting & rigging purposes, such as split overhaul balls, triangle plates and pad eyes.
